

# Symantec™ Mail Security for Microsoft® Exchange

An integrated security solution that protects against viruses, spam, and security risks, and enforces company policies

---

## Overview

Symantec™ Mail Security for Microsoft® Exchange provides high-performance, integrated mail protection against virus threats, spam, and security risks, and enforces company policies on Microsoft® Exchange 2000/2003 servers. By purchasing a license key, a Symantec™ Premium AntiSpam subscription can be integrated to provide accurate spam detection without additional administration, installation, or hardware.

---

## Key benefits

- Enhanced centralized management enables administrators to update settings of individual servers and groups of servers remotely
  - Optional Symantec™ Premium AntiSpam subscription service provides best-of-breed spam prevention with low administrative overhead and no additional software to install
  - Hourly virus updates using Symantec Rapid Release enable organizations to respond quickly to new threats
  - Advanced policy rules filter inappropriate content within most file formats and block files based on true file type (not just file extension)
  - Backed by Symantec™ Security Response, the world's leading antivirus and Internet security research organization
- 

## New features in this release

- NEW! Flexible user- and group-based policy enforcement rules allow creation of targeted rules to prevent inappropriate communications
- NEW! Enhanced reporting provides schedulable

summary and detail reports which can be automatically sent to designated recipients

- NEW! Security risk management features help block spyware and adware, and mitigate existing security risks
  - NEW! Redesigned user interface provides an intuitive, consistent, high performance administration experience
-
